## 30 Years in Science Secular Movements in Knowledge Creation

---

S. Naderi-Jolodar  
A. A. Saboury\*<sup>1</sup>

### Abstract

---

This paper is a report of Science-Metrix of Canada in 2010, which has been translated to the Persian language without any interference and possession. Although the content of this paper is very interesting; however, in some cases, for examples the number of martyrs in imposed war and also the relationship between any researches with the nuclear research in Iran are not compatible with the opinions of interpreters. The original English text of this paper has been taken from the internet site of [www.science-metrix.com/30years-paper](http://www.science-metrix.com/30years-paper).

*Keywords: Science Movement, fall, and Rise of Knowledge Creation, Scientometrics, Regional Scientific Movements.*
