

# The Industrial Policy in Some Countries and Iran

N.Mokhtarzadeh<sup>1</sup>, A.Kiani- Bakhtiari<sup>\*2</sup>

Industrial Policy is one of the major issues of economic which has a theoretical history dating back to the eighteenth century. Industrial Policy” is a strategic effort to encourage the development and growth of the manufacturing sector of the economy.

This paper reviews the evidence on emerging new trends in the sphere of industrial policy in some countries and IR. Iran. The extension of the industrial policy has been led to industrial revolution in all developed and developing countries. Interestingly, even the industrialized world; are following “new industrialization approaches”. Lack of policies in industry will disturb the balance of countries’ development.

The global economic crisis provides the ground for revising all attitudes, theories and policies at service of industry.

The development of industrial policy in Iran can also be realized through the programs and supreme development documents of the country will be highlighted in this research.
